

A NEW UNDERPRINT?

By Tony Edwards

The stamp illustrated below has been shown to me by a Canadian collector. It is not a perfin as the dots appear to have been printed on the back of the stamp rather than perforated through it. The stamp is a George VI issue with clipped perforations suggesting a coil issue. The design of the underprint is similar to the perfin number O2160.03, but not identical to it.

Does anyone have any ideas about this item? Is it an unofficial underprint?
